SUMMARY

Versatile engineer skilled in Python, C++, SQL, and AI/ML, with a focus on building robust software and data systems. Committed to delivering efficient, scalable, and high-quality software solutions.

PROJECTS

GestureAI Mobile App

GestureAI is an app that translates American Sign Language to text utilizing Python, OpenCV and TensorFlow. This app uses machine learning models to decipher sign language in real time to provide more accessibility to hearing impaired people

All projects can be viewed in more detail here: <https://tarismajor.github.io/Projects.html>

Education

Midwestern State University | Wichita Falls, TX

Dec '25

Master of Science Computer Science

Midwestern State University | Wichita Falls, TX

Aug '20

Bachelor of Science Mechanical Engineering

Work Experience

Midwestern State University | Wichita Falls, TX

Aug '23 - Dec '25

Computer Science Graduate Assistant

- Led C++ lab sessions for 30+ students, **achieving a 98% pass rate** by breaking down complex programming concepts into accessible, hands-on lessons
- Instructed technical exercises (e.g., dynamic memory allocation, linked lists) that boosted coding proficiency and **improved average grades by 12%**

Tongrun Innovation | Bonham

Feb '22 - Aug '23

Design Engineer

- Engineered mechanical systems with a **DFM** approach, integrating **data-driven** workflows and automation to optimize efficiency and scalability
- Developed 3D models, technical drawings, and BOMs with **version control** and **software-assisted simulations** to streamline system design and ensure manufacturability
- Implemented **PDM** and data management solutions to ensure compliance, improve performance, and reduce costs by 15% through **cross-functional collaboration** in Marketing, Sales, & Operations

Technical Skills

Programming: Python, C/C++, MATLAB, Git / GitHub, Linux / Ubuntu, PyTorch, TensorFlow, JavaScript, SQL

Mechanical: SolidWorks, CAD, 3D Modeling, FEA, Simulation, Design for Manufacturability (DFM), PLM

Professional: Analytical Thinking, Cross-functional Collaboration, Project Management, Adaptability
